PRINCIPLES OF PROGRAMMING LANGUAGE

(2019 Pattern) (Semester - IV) (204206)

Time : 1 Hour]

[Max. Marks : 30

Instructions to the candidates:

- 1) *Solve Q.1 or Q.2 and Q.3 or Q.4.*
- 2) *Neat diagrams must be drawn wherever necessary.*
- 3) *Figures to the right side indicate full marks.*

Q1) a) Define the Syntax and Semantics. Compare the axiomatic semantics and denotational semantics. [7]

b) What is importance of Reliability and Maintainability to programming languages? List the factors which ensures the reliability and maintainability. [8]

OR

Q2) a) What is interpolation and translation process? With neat diagram state the purpose of each activity in language processing with interpolation and translation. [8]

b) Explain an abstract semantic Processor and their run time structure. [7]

Q3) a) Explain how following concepts are used in design of data types with examples.(Any two) [8]

(i) Data aggregates and type constructor

(ii) Cartesian Products

(iii) Finite Mapping

b) What is Built-in and Primitive data types? Explain Primitive data types of C++ and java. [7]

OR

Q4) a) What are Abstract data types? Explain and give examples. [8]

b) Explain Routines with examples. [7]
